

SHERWYND LIEW LI-YUAN

BACKEND DEVELOPER | PHP, LARAVEL & AWS DEVOPS

+60 16 950 8763 | sherwyndliewliyuan@gmail.com | Kuala Lumpur / Petaling Jaya, Malaysia

LinkedIn | GitHub: sherwynd | GitHub: shawn627

PROFESSIONAL SUMMARY

Backend Developer with 1+ years of experience building PHP/Laravel and Node.js services, RESTful APIs, and cloud-ready applications. Hands-on experience managing AWS ECS and EC2 Auto Scaling workloads, provisioning server infrastructure with CloudFormation, and investigating server and client request issues with AWS Console and CloudWatch. Known for self-directed learning, practical troubleshooting, and taking ownership from application code through deployment infrastructure.

PROFESSIONAL EXPERIENCE

Backend Developer | DES DIGITAL MARKETING Sdn Bhd

Apr 2025 - Present | Subang Jaya, Selangor

Environment: PHP, Laravel, Node.js, TypeScript, MySQL, AWS Lambda, ECS, EC2, CloudFormation, CloudWatch, Docker

- Develop and maintain backend services using PHP, Laravel, Node.js, TypeScript, and MySQL, with a focus on reliable API behavior and maintainable code.
- Manage containerized workloads across AWS ECS and EC2 Auto Scaling, supporting scalable deployments and a documented 45% reduction in server traffic load.
- Create AWS CloudFormation stacks to provision repeatable server infrastructure and reduce manual environment setup.
- Investigate server health, deployment behavior, and client request issues using AWS Console and CloudWatch, translating findings into corrective actions.
- Implemented AWS Lambda authentication services with OAuth 2.0, contributing to a documented 30% reduction in infrastructure cost.

Backend Developer | IP ServerOne Solutions

Sep 2024 - Dec 2024 | Petaling Jaya, Selangor

Environment: Laravel, PHP, MariaDB, Docker, Kubernetes

- Developed and maintained Laravel REST APIs for NovaCloud Hosting, a multi-region cloud platform designed to route users to nearby infrastructure.
- Supported backend reliability and performance across multi-region deployments using PHP, MariaDB, Docker, and Kubernetes workflows.
- Implemented automated unit tests to improve code reliability and identify defects before production release.

Full Stack Developer | Fusionex Group

Jul 2023 - Dec 2023 | Petaling Jaya, Selangor

Environment: Vue.js, Node.js, Express.js, MongoDB

- Developed a custom transportation web application using Vue.js, Express.js, Node.js, and MongoDB.
- Integrated a machine-learning handwriting recognition module to improve document processing workflows.
- Collaborated in Agile Scrum ceremonies including sprint planning, backlog refinement, and daily standups.

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, TypeScript, JavaScript, RESTful APIs, OAuth 2.0, SOLID principles

AWS & DevOps: AWS ECS, EC2, Auto Scaling, Lambda, CloudFormation, CloudWatch, Docker, CI/CD

Databases: MySQL, MariaDB, MongoDB, PostgreSQL, Supabase, Firebase

Tools & Workflow: Git, GitHub, GitLab, Jira, DockerHub, VS Code, Cursor, Terminal, Agile, Scrum

Additional Development: Next.js, React, Vue.js, Angular, Python, Flask, Java, Tailwind CSS

CORE STRENGTHS

Analytical problem-solving: traces issues across client requests, application services, container workloads, and AWS infrastructure.

Communication and ownership: documents findings, collaborates through Jira and Agile workflows, and follows issues through resolution.

Adaptability: independently learns unfamiliar cloud services and applies them to active delivery and troubleshooting work.

EDUCATION

Bachelor of Information Systems | University Malaya | Jan 2025

CGPA: 3.78 / 4.00 | Programme Unit, Students' Union | UMHackathon participant | Programming League National committee

Science Stream | Johor Matriculation College

Science Stream (SPM) | Sultan Abu Bakar School

SELECTED TECHNICAL PROJECTS

Student Sport Portal | Next.js, OAuth 2.0, dashboards - Built event CRUD workflows, automated certificate generation, Google authentication, and real-time administrative reporting. [View repository](#)

Water Potability Prediction | Next.js, machine learning - Built an interactive prediction application with exploratory data analysis, server-side analytics, and model comparison. [View repository](#)

Ecommerce Sport Website | Full stack, payments - Implemented simulated payment flows, order management, blogs, and event registration. [View repository](#)

PROFESSIONAL DEVELOPMENT

Built practical AWS knowledge through self-directed console work and production troubleshooting across ECS, EC2, Auto Scaling, CloudFormation, and CloudWatch. Current growth goal: formalize this hands-on experience through structured AWS certification study.
